

COMPONENT CATEGORIES

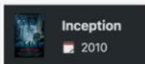

👉 Most of your components will **naturally** fall into **one of three categories**:

Stateless / presentational components

- 👉 No state
- 👉 Can receive props and simply *present* received data or other content
- 👉 Usually **small and reusable**

Stateful components

- 👉 Have state
- 👉 Can still be **reusable**

Search movies...

Structural components

- 👉 "Pages", "layouts", or "screens" of the app
- 👉 Result of **composition**
- 👉 Can be **huge and non-reusable** (but don't have to)
