

Function based Components

```
const App = ()=>
{
  return (<h1>Hello</h1>);
}
```

1. Function name should start with capital letter.
2. Function should return a markup.

```
const Pizza = ()=>
{
  return (<h2>Pizza</h2>);
}
```

```
const App = ()=>
{
  return (<h1>Hello</h1><Pizza/>);
}
```

3. Each component should return only one element.

```
const Pizza = ()=>
{
  return (<h2>Pizza</h2>);
}
```

```
const App = ()=>
{
  return (
    <div>
      <h1>Hello</h1>
      <Pizza/>
    </div>);
}
```
